Elizabeth:

A couple of comments about Task 14:

1) Mark's comment about air toxics monitoring at Cherokee Heights (Pryor monitoring site) and referenced NCore FY10/FY09? air toxics monitoring, requires clarification/revision.

2) NCore is currently proposed to be required at all NCore monitoring sites by 01/01/11, with comments being sought before 01/16/10, on whether Pb monitoring should be required at rural NCore monitoring sites. At this point in time, ITEC needs to be aware that the final Pb monitoring reconsideration proposal addressing accepted petitions, is not expected to be finalized until late calendar year 2010-Q3!

Liz, here are my comments on the Cherokee Nation's modified workplan.

1. Adding information to Regina's first and second comments, it is my understanding from a previous conversation with Ryan that the \$8,000 from Task 6 are left over unexpended CAA 103 funds at the time the CAMD funds were received (1/1/2010). Also, I believe that CAMD purchased the Tekran equipment for the Stilwell site (note the sentence in Task 6 that states "All equipment has been provided by EPA Clean Air Markets Division.").
2. Is the current Task 14 meant for the Stilwell NCORE site or the Pryor site? NCORE is mentioned in the title of the task and in the first paragraph under "Method" but Pryor is also mentioned above "Method" and in planned output #2. This needs to be clarified.
3. New task 15 should add an additional planned output right after #3 which would read: "Comments on the site assessment document from EPA Region 6, ODEQ, and ADEQ, will be discussed and adequately addressed." Planned output #5 should be revised to read as follows: "If agreed upon by all parties (i.e. EPA Region 6, ODEQ, ADEQ, and Cherokee Nation), relocate the station in late FY10 (e.g. August-September 2010). Start up would be in the FY11 fiscal year."

Let me know of any questions on this and thanks for the opportunity to review and comment.

Subject: Cherokee Nation Workplan - Revised

Liz,

I have the following comments/questions on Cherokee Nation's modified workplan.

- Is the \$8,000 mentioned in Task 6 the line item amount for this previously approved activity or the anticipated amount of unspent funds for not pursuing this activity?
- Did CAMD or R6 Tribal 103 funding purchase the Tekran equipment at Stilwell?
- Is Cherokee Nation not actively pursuing Task 14 (Pb sampling) for the duration of FY10? Should R6 expect to see this activity in CNEP's workplan for FY11 activities upon acquiring a lab with EPA FRM/FEM analytical methods for Pb?

Regina
